

## Computing Blogs

Some of you have created some fantastic blogs already, which I have really enjoyed reading.

If you haven't started yet: **Log on to Purple Mash and find the My Blog section in tools. A detailed set of instructions will come up about how to do this. You will see there is a class blog section, where I have written something and there is a pupil section.**

**This week I have added some photos taken when out and about. Click on the Class blog section and you can read what I have written, then you need to click on the + in the pupil section and create your own blog there.**

Once you have set up your Blog page, you need to click on the green + in the top right hand corner of your page. This will take you to the main pages on which you can write about what you have been doing. To create a new post, enter your blog, turn **edit** on and then click on the +.

Can you add pictures or photos as I have done?
