

Friday 22nd May y6

Yesterday we looked closely at mean or average. Today we will also look at range, median, mode.

First of all, watch [bbc bitesize ks2 how to find the mean, median, mode and range](#)

(Watch the video, re-order Putter's score card and fill the gaps)

Remember that median is exactly half way between the 2 numbers in the middle of the line if you have an even set of data.

Do you remember our song to the tune of Frere Jacques?

Try it out at home. Ask other family members to help you to sing this in a round to help you remember it:

Mean is average, mean is average.

Mode is most. Mode is most.

Median is middle. Median is middle.

Range high low. Range high low.

Now

Search [mean median and mode song teacher tube math](#)

I watched this more than once!

Next,

Have fun reinforcing your understanding of mean, mode, median, range by searching for [topmarks ks2 data handling games](#)

And scroll down to play the bamzooki zooks are loose!
(mode, median, range)
