KS2 Art

Today we are looking at self-portraits.

Here are some examples of self-portraits by famous artists.

Frida Kahlo

Pablo Picasso

Vincent Van Gogh

Van Gogh painted many self-portraits. He didn't have enough money to pay someone to sit while he drew them so he used a mirror and drew himself. You can see more of his self-portraits here:

His self-portraits are similar in some ways but different in others. Have a go at drawing two different portraits of yourself. Use a mirror and look carefully at your features before you start. Try to draw what you see. If you would like some tips for drawing faces, watch this BBC video first:

I would love to see your portraits if you would like to send in a photo of them of them.
