

## KS2 Science     June 11<sup>th</sup>

Hello Oaks,

Here are this week's science activities for you to choose from. I hope you enjoy the challenges and games. Mrs Bridge

### Y3/4

Watch the video about **food chains**. <https://www.bbc.co.uk/bitesize/clips/zws87hv>

There are some great Food Chain Challenge games on the BBC website under the topic **Food chains and Habitats**

<https://www.bbc.co.uk/bitesize/topics/zbnnb9q> (However, **Y5/6** will love this too – plenty of challenge, gets harder and harder)

and a great **BBC Bitesize worksheet** (see attached file which uses **producer/prey/predator** vocabulary)

*Identify, classify and group.*

### Y3/4

For children who like cutting and sticking

Choose a different habitat e.g. woodland or sea and cut out pictures and make your own **foodchain**. Take care that the arrows go in the right direction. The energy goes from the sun to the producer to the prey to the predator.

*Identify, classify and group.*

(See attached picture sheet file).

**Y5/6** Find out about some of the **History of CLASSIFICATION of ORGANISMS** by looking at the Powerpoint. (see attached ppt file)

Find out about Carl Linnaeus from watching:

<https://www.youtube.com/watch?v=-LVunuIOT4w&safe=true>

Write up what you have found out about Aristotle and Carl Linnaeus

Look at the **Food Chain Games for Y3/4** – you will love them and find out so much about different animals and plants in different habitats.

*Research using secondary sources*
