

Tuesday 9th June y3

Hello y3. Today you are going to show the levels of class within the Ancient Greek army.

The highest class(or group) were paid the most money and had the best privileges- special rights. The next class (group) down would not be paid quite as much...the next class down would be paid even less and the soldiers in the lowest class would be the most poorly paid.

Search **social classes of ancient Greece by instructomania**

Skip and scroll forward to 1.00 on the time bar to the page that says

A man's wealth (which means how rich he is) **is determined by his status** (which class/job he did)

Now watch the part of the video about the ranking of soldiers in the Greek army from higher class to lower class

Now fill in this ranking pyramid below by drawing the correct pictures in the correct sections. Look at the video and pause pages to copy the soldiers. Remember that the highest class goes in the very top section of the pyramid and the lowest class of soldier within the army goes in the bottom section.
