

Y5 Friday 17th July

In your task today you can use brackets and the signs to add subtract multiply and divide.

You can use these signs more than once.

You can have more than one pair of brackets in the mathematical statement but the goal is to make the target number at the beginning.

So, for example:

20 17 7 21

The answer to make 20 is

$$(21 \div 7) + 17 = 20$$

Are you ready to make the target numbers on the worksheet? Off you go!
